An Important Specialty of Ours:-

Tailor-Made Suits for Women

At \$25.00, \$35.00, \$45.00

A SERIES OF 45 NEW SPRING MODELS

Rather than an innovation, it is the development of a part of our business. Ever have we centred our strength upon suits at \$25.00; \$35.00 and \$45.00. Beginning with this season, that series of garments rises to the dignity of a specialty.

Why? Because we have found the ways and means to present tailored suits at those prices, in a variety of styles, fabrics and colors, at least twice greater than that of any other shop.

Yet the variety is but incidental. The greater strength of the series of garments lies in this:-in style and character you will find our tailored suits at \$25.00, \$35.00 and \$45.00 to be on a level with these that usually command again as much.

Nor will we be satisfied with the forty-five models that are ready. As the season advances, we shall augment the co'lec' ion with the adaptations of the new foreign models as soon as they are designed.

### Exclusive Spring Millinery

We have a right to assume that our collection of millinery is exclusive, since the models from which we gathered the ideas and innovations, we ourselves did import.

The original models are not an unimportant feature of the collection.

While our organization is not of the class that can concern itself with cheap hats, still wi'l you find that our prices are well within reason.

### Furs Offered as an Investment

When you accept a thing as an investment, it is because in your mind and to your judgment, its value is greater than the price you are asked to pay for the thing.

In this instance, it is not a matter of opinion nor judgment, but an established fact, that next season the prices of standard furs will be about one-third more than this season's prices. In the immediate past our experience has demonstrated this to us beyond contention.

Yet we would rather not store the furs which we have in stock. Will you accept them as an investment at prices which are from one-half to one-third less than their present value?
